

Managing Motion

ABI. INNOVATION IN IMPLEMENTATION.

The strength of an idea

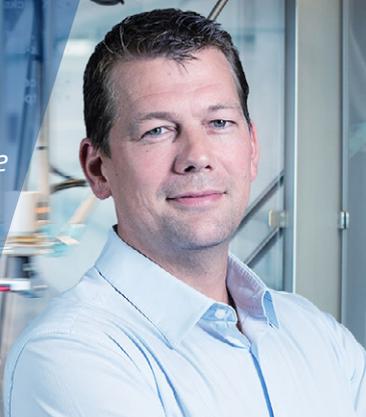

ABI specializes in drives, motion control, and robotics. Whether it's a standard or tailor-made solution, or a new or an existing system, continuous innovation and smart design are essential. That is exactly what we do with our state-of-the-art range of machinery, meeting the most complicated of needs with our advanced production lines. You can benefit from almost 100 years of experience in engineering, production, and trade. Knowledge and expertise are an integral part of this professional family business.

Together with our extensive team of passionate and skilled colleagues, we are constantly in motion - always hard at work developing specialist applications down to the last detail. True experts who are there right beside you from day 1 to help come up with the ideas and keep you up to date on the latest developments. That is how we deliver solutions that keep you ahead of the game.

THINK.

"A capacity for innovative solutions and sophisticated customization throughout the entire process."

is in its implementation.

CAN.

*"The right system for
your needs every time.
Practical implementation
with professional
support."*

Quality and robustness are in our DNA. They form the foundations for the custom-made drives, electric motors, gear motors, servo motor systems, linear drives, precision gearboxes, precision delays, robot controls and delta robots. We are proud of the innovations we have developed in-house. Custom-made drives, stainless steel drives, and ABIflexx delta robots that meet the highest of demands. And we never lose sight of the big picture. After all, the system has to function as a whole.

Whatever you're looking for, our wide range of products offers comprehensive tailor-made solutions. But that's not all. Our service extends from consultancy to production, including seamless support throughout the entire process.

DO.

*"Flawless production
by our passionate and
skilled professionals.
Our energy is what
drives you forward."*

What we do

We produce custom-made drives, electric motors, gear motors and stainless steel motors in our advanced production facility. We also supply complete drives, motion control solutions, and industrial robots from renowned partners in the Benelux. We lead the way in the field of robotics, developing and producing our own ABIflexx delta robots.

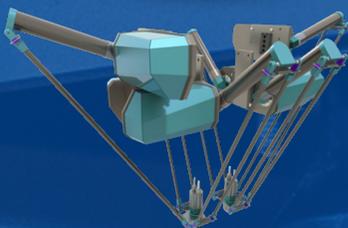

DRIVES

- Complete range of in-house machinery
- Motors, gear motors, and custom-made drives developed on site

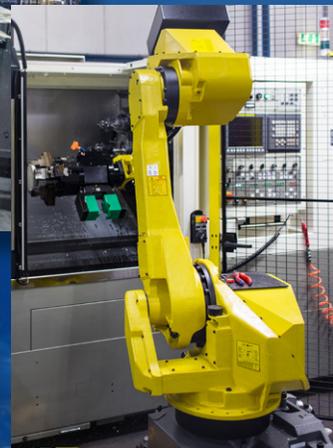

MOTION CONTROL

- From simple systems to high-end applications
- Extensive knowledge of dimensioning and implementation

ROBOTICS

- Development and construction of our own delta robots
- Sophisticated product range from leading manufacturers

Engineering

We are there right beside you from day 1, helping you come up with ideas while we develop and implement individual applications for complete drive and control systems.

Support

We will answer any questions you might have about your drives at any time and provide training to learn how to operate the systems we developed.

More information?

Our specialists will be happy to help you.
