The newest addition to the RS series, perfectly suited for index tables: RS-50A, capable of high speed rotation, and with a max allowable load of 1,500 kg

Nabtesco

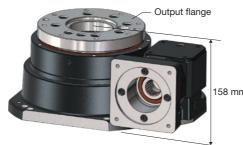

RS-50A

Features

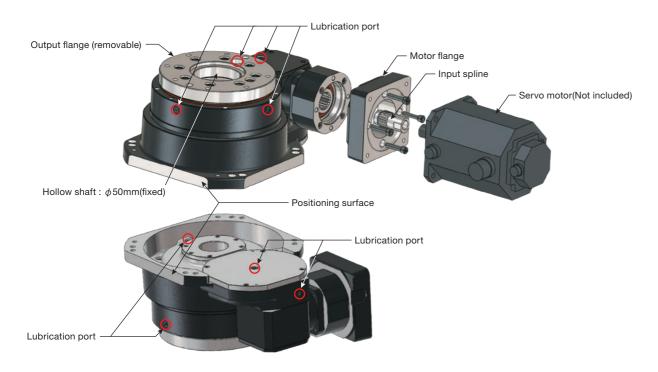

- A gearhead utilizing the industrial robot industry-proven Precision Reduction Gear RV™ High accuracy, rigidity, and reliability
- Shorten cycle times with high speed rotation High speed indexing (180° in 0.7 sec, with 10kgm² moment of inertia)
- Compact size reduces total height of machine Distance from base to output flange: 136mm
- Hollow shaft for wiring ϕ 50mm hollow shaft diameter
- Compatible with all major servo motors Support for different manufacturers mounting pattern and shaft shape
- 2 models available: with or without output flange Selectable in accordance with the customer's equipment
- Pre-lubricated Sealed and filled with optimal amount of oil (RV OIL SB150), allowing for easy installation and set-up
- Easy oil changing Ports located on all faces

[Without output flange] ··· Height : 136 mm

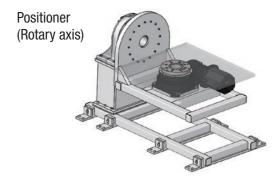

Application Examples

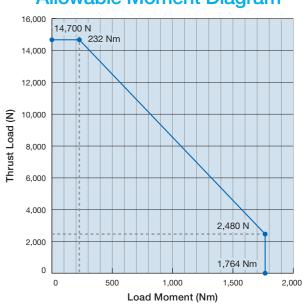

Specification Table

	RS-50A
	1,500 kg
	φ50 mm
	490 Nm
ue	1,225 Nm
vable torque	2,450 Nm
	15 rpm
	60 rpm
	1,764 Nm
vable moment	3,528 Nm
	60 arc.sec.
	±5 arc.sec.
Dia. 500 mm	±0.012 mm
	65.4 , 130.8 , 163.5
	Endless*2
e and input spline)	40 kg
	vable torque vable moment Dia. 500 mm

- *1 The allowable output speed may be limited by operating rate. Make sure the surface temperature of the reudction gear does not exceed 60°C during use.
- *2 The operation range may be limited by the motor.
- *3 The measurement system complies with JIS B 6192.

Allowable Moment Diagram

^{*}In an application subject to both a load force and a moment load at the same time, please make sure to use the product within the allowable moment range listed in the diagram above.

Center of Gravity Height and Allowable Load Range
